★★★★★ **Compelling Creationism**, August 30, 2015

By [Mike Volker](#) **Verified Purchase**([What's this?](#))

**This review is from: evolution - The Greatest Deception in Modern History: Scientific Evidence for Divine Creation (Kindle Edition)**

As a person who had been brainwashed by the public education system into believing that evolution was a "fact," this book, in layman's terms, deals with complex geological and genetic issues in a simple way to show that there are features in the geologic strata which defy scientific explanation. For example, limestone formations which are hundreds of feet thick with a chemical purity of 97% with no corals or sponges within them as you would expect if formed in shallow coral reefs. Modern fossils found in ancient strata. Massive over thrust layers wherein the top layer is much older than the younger layers below - geologists cannot explain them, but a massive flood and geologic disaster can. Carbon 14 is supposed to completely decay after 100,000 years, yet carbon 14 is found in diamonds and coal - which are supposedly millions of years old. Regarding DNA, geneticists cannot identify a single instance in which a new chromosome or gene has been created with new useful function. In virtually every case genetic change results in a loss of function, not a gain in new function. The universe could not have created itself - something cannot come from nothing. When the most basic reproducible cell is explained, it is impossible for it to have been created by random chance. Hear this - the most basic reproducible cell contains 134 proteins, each protein consisting of 300 amino acids, each amino acid is a left-handed amino acid (in all living things) which left and right handed amino acids are created and bond together equally easily; DNA is needed to properly order the amino acids and a cell membrane is needed to prevent the water in the "primordial soup" from washing away the amino acids. The odds on that happening randomly are equivalent to us firing a hand-sized rock into space, having it hit a satellite and have the satellite fall back to earth and land in the bed of a speeding truck. The Bible says that God created the animals according to their "kinds," and that appears to be accurate. All in the same family, and are inter-reproducible, are the wolf, dog, dingo, fox and coyote. Yet, an archaeologist would think he had discovered 5 different species. Archaeologists insist that birds evolved from dinosaurs because the collagen found inside a dinosaur bone matches most closely with a bird. Well, in my view they are correct, they descended from an ancient pterodactyl - a BIRD!!! Micro-evolution is a proven fact, the family of wolves, dogs, foxes, etc proves that, but all it proves is what the Bible says in the first place - God created the animals according to their kinds - what we could call "families." This is an excellent read and I am much more open now to a much younger earth, a God-created universe, earth, original life, and families of animals. One last point they make in this book; while it is true that humans share 95% of their DNA with a chimpanzee, so what, humans also share 60% of their DNA with a rat. This book is an easy to understand science book and will challenge the brainwashing schools do to kids with teaching evolution as a fact. I am now a creationist after reading this book.

★★★★★ **Evolution is Indeed the Greatest Deception**, October 3, 2013

By [Douglas B. Sharp](#)

**This review is from: evolution - The Greatest Deception in Modern History (Scientific Evidence for Divine Creation) (Paperback)**

This is a well-written book: an overview of scientific evidence for a worldview that matches the Biblical framework. It contains many photographs and illustrations, and is easy to read. There is a comparison of the creationist and evolutionist worldviews, both providing an interpretive framework for analyzing the evidence. Since we cannot reverse time, we cannot review what happened in the past experimentally, we can only speculate what happened based upon what we find in the present. There are chapters on the physical evidence for creation, biological scientific evidence, catastrophic phenomena in geology, geomorphic features of a worldwide flood, sedimentary features of a worldwide flood, fossil dating, radioisotope dating, and many other scientific analyses. To say that this is a "religious" book is to use the old canard that if it contains a theological perspective, it cannot be science. Nothing can be further from the truth. In fact, if you examine the history, science as we know it would never have come to be were it not for Christian influence.

★★★★★ **Very complete, could be the only book you need !**, November 16, 2014

By [Mario Caluori](#)

**This review is from: evolution - The Greatest Deception in Modern History (Scientific Evidence for Divine Creation - Creation vs Evolution) (Paperback)**

This book is so good you really don't have to buy something else. It is very thorough and well documented. For example, he mentioned they found soft dinosaur tissue (collagen protein) and I was able to trace the reference all the way to the journal, Nature. This gave me confidence in believing the rest without having to check everything.

I really like the large size of the book and it's large print, with lots of space to put my notes. I wish other publishers

could follow and do the same. It is real easy on the eyes.

I like the mix of science and scripture. It must drive the atheists nuts, which makes me love it even more. Why don't they stop buying our books and rating them 1 star when they are clearly 5 star. The author is a geologist of 35 yrs experience and it shows. He makes a strong case for creation. Since geology is my least familiar science, I benefited a lot.

★★★★★ **The new 2014 edition is Excellent!**, June 18, 2014

By [pennmardel chase](#) **Verified Purchase**([What's this?](#))

**This review is from: evolution - The Greatest Deception in Modern History (Scientific Evidence for Divine Creation - Creation vs Evolution) (Paperback)**

This 2nd edition of Roger Gallop's book, evolution - The Greatest Deception in Modern History, has all the charts, illustrations, photographs, diagrams and well-organized chapters as the original edition, plus some updated, and additional content in the Prologue, Chapter 3 and a few other sections. As before, this is a great resource for everyone who would like to learn more about the staggering wealth of scientific evidence in support of Divine Creation and the remarkable lack of scientific evidence in support of the theory of evolution. Dr. Gallop should be congratulated for putting together such a high quality, easy to read, scholarly review of the key issues surrounding the creation vs. evolution debate. A must read for everyone who would like to be better informed about this important topic.

By [Heathyr Rogers](#) **Verified Purchase**([What's this?](#))

**This review is from: evolution - The Greatest Deception in Modern History: Scientific Evidence for Divine Creation (Kindle Edition)**

This book gives amazing insight to the geological and biological processes of our Earth and the life contained in it. It is not written in a self-righteous, morally superior tone. This book is simply and concisely written, and explains Creation in a scientific and accessible way.

★★★★★ **A MUST read!**, July 20, 2012

By [Amazon Customer](#) **Verified Purchase**([What's this?](#))

**This review is from: evolution - The Greatest Deception in Modern History (Scientific Evidence for Divine Creation) (Paperback)**

This book is a MUST read! It is captivating and compelling...and covers all the bases! This book disproves Darwin's theory of evolution beautifully. Dr. Gallop clearly shows that evolution is a great deception....and scientific laws and evidence are perfectly consistent with creation. I encourage anyone who questions what the world tells you regarding evolution to take the time to read this book. It will most certainly challenge your views and help you find the truth. I highly recommend it!

**Customer Review** ★★★★★ **Fantastic information debunking evolution**, July 16, 2016

By [Thomas G Noble](#) **Verified Purchase**([What's this?](#))

**This review is from: evolution - The Greatest Deception in Modern History (Scientific Evidence for Divine Creation - Creation vs Evolution) (Paperback)**

Fantastic information debunking evolution. It should be read by every high school student in America to help them decipher observable science from "belief" about the unobserved past. There is no scientific reason to believe in Darwin's silly fairy tale

★★★★★ **Best evolution vs Creation book I've read**, August 1, 2013

By [pennmardel chase](#) **Verified Purchase**([What's this?](#))

**This review is from: evolution - The Greatest Deception in Modern History (Scientific Evidence for Divine Creation) (Paperback)**

Roger Gallop PhD has done a great job putting this book together in a logical, thoughtful manner, so every reader can decide for themselves whether available evidence and scientific facts better support the theory of evolution or special Creation. His book, "evolution- The Greatest Deception in Modern History" is very well-organized, highly educational, and easy-to-read. The many charts, illustrations, photographs, diagrams and appendices are extremely helpful in explaining complex scientific facts in language that all can understand. It is rare to find a science book of this high

caliber, so enjoyable to read and yet, so clearly presenting complex scientific and technical information to anyone searching for the truth about evolution vs. Creation. I highly recommend this book.

**★★★★★ Take the red pill, Neo: Read this book!**, August 22, 2014

By [David A. Katz](#)

**This review is from: evolution - The Greatest Deception in Modern History (Scientific Evidence for Divine Creation - Creation vs Evolution) (Paperback)**

This is a magnificent book. Truly, a must read for anyone serious about the scientific evidence regarding evolution. All I can say is buy it and read it. Evolution: "It is the world that has been pulled over your eyes to blind you from the truth. " Take the red pill, read this book, and discover the real world.

★★★★★ **A Must Read for anyone interested in the Truth**, December 18, 2013

By [DoveSpeak](#)

**This review is from:** evolution - The Greatest Deception in Modern History (Scientific Evidence for Divine Creation) (Paperback)

This is a great book—well organized, easy to read with scientific evidence that overwhelmingly supports Creation and a young earth. It covers all the sciences and disproves molecules to man evolution and shows that evolution is not proven science. If you are interested in the Truth, this is a must read!
